

ANTIBIOPTAL Eye Drops

Neomycin Sulphate 340,000 I.U.
Chloramphenicol 0.5gm

اینٹی بائیوپٹل

آنکھوں کے لئے قطرے ہر شیم سے پاک

STERILE OPHTHALMIC SOLUTION

Composition: Each 100 ml contains Neomycin Sulphate 340,000 IU and Chloramphenicol 0.5 g.

Pharmacotherapeutic group: ophthalmic antibiotic combinations.

Indications: Antibioptal is indicated for anterior chamber infections caused by susceptible bacteria Gram-negative and Gram-positive.

Contraindications: Hypersensitivity to any component of the product. **Precautions:** Prolonged or repeated use of the product can lead to the development of resistant organisms, including fungi and sensitization phenomena, mainly to neomycin, also are possible cross hypersensitivity reactions to other aminoglycosides. In these cases, or if no notice improvement after about 7 days of therapy, the physician should be consulted who will take appropriate measures. In rare cases, bone marrow hypoplasia was observed after prolonged topical use of chloramphenicol. Accidental or long-term administration of high doses can cause toxicities (Ototoxic / nephrotoxic to neomycin and marrow hypoplasia for chloramphenicol). Administration to young children should be considered only if absolutely necessary and only under medical supervision. The product must be used within 30 days after first opening.

Interactions None known.

Special warnings Pregnancy and breastfeeding

Antibioptal not be administered during pregnancy and lactation unless the benefit maternal fetal therapy outweighs the potential risk. In these cases, the use of the product will be only under medical supervision.

The ability to drive and use machines

Antibioptal not affect ability to drive or operate machinery.

Dosage and administration: The recommended dose is 1 to 2 drops instill into the conjunctival sac, 3-6 times per day.

Adverse Reactions: Prolonged use may cause sensitization phenomena (burns, swelling, angioedema, urticaria, vesicular and maculopapular dermatitis) in these cases treatment should discontinued. Side effects due to systemic absorption of chloramphenicol and neomycin are unlikely. The product has low toxicity and is well tolerated locally. Neomycin produces skin sensitization.

Storage: Store between 15 to 25°C. Protect from light. Keep all medicines out of the reach of children.

Presentation: Antibioptal Sterile Ophthalmic Solution is supplied in 10 ml plastic dropper bottle.
